aiimi

AI-powered legacy system migration with up to 80% savings.

# AI-powered legacy system migration with up to 80% savings.

With the Aiimi Insight Engine's Legacy Decommissioning tools, you have total control and visibility over your legacy data and everything you need to run your system migration, including:

→ **Support for all data systems and file types**

→ **AI-powered enrichment to audit, derisk, and add value to your legacy data**

→ **Secure, low-cost Cloud storage for your migrated data**

→ **Powerful discovery tools to access your mission-critical data at rest and in migration**

MANAGING YOUR IT RESOURCES

When you choose to decommission costly outdated applications, your system owners no longer need to spend their time maintaining these legacy systems – that means more bandwidth for your biggest IT and infrastructure priorities.

Delivering a 488% return on investment for a utilities customer.

With savings of over £2.3million across 5 years, plus the Aiimi Insight Engine's added data risk and governance benefits, this customer cut ties with their costly legacy system and maximised the value of their critical data.

BEFORE | MAINTAINING THE LEGACY SYSTEM

System owner salary costs (1.5FTE)	£112,500/year
